

FSSC 22000-Q Questions & Answers

DATE : January 2016
VERSION : 2
NUMBER : 20460385

1. Why has FSSC 22000-Q been developed?

There has been strong interest from organizations using FSSC 22000 certification for an opportunity to integrate food quality management in the scope of their certification. To meet this demand, the Board of Stakeholders (BoS) decided on 24 February 2015 to add a voluntary ISO 9001:2008 module to the existing FSSC 22000 certification scheme, offering a combined FSSC 22000 and ISO 9001 certificate. As from 1 March 2015 FSSC 22000 and ISO 9001 can be assessed as an integrated management system called FSSC 22000-Q using CBs approved by FSSC 22000.

2. Is FSSC 22000-Q mandatory?

No, it is a voluntary assessment of FSSC 22000 integrated with ISO 9001. Organizations can still continue to choose a separate ISO 9001 certification. Keep in mind: You can do a food safety management (FSSC 22000) audit without covering quality, but not the other way around, i.e. you cannot do a quality audit (ISO 9001) and cover safety or you cannot do a FSSC 22000-Q Certification without covering food safety.

3. Is it possible to have separate FSSC 22000 and ISO 9001 certificates?

Yes, it is possible but FSSC 22000 does not encourage the issuance of a separate ISO 9001 certificate instead of a FSSC 22000-Q certificate. The purpose of the assessment of the integrated FSSC 22000-Q is a combined FSSC 22000-Q certificate that names each standard assessed. For example FSSC 22000-Q (Category E) would list these standards completely assessed on the certificate: ISO 22000:2005, ISOTS:22002-1:2009, FSSC Additional Requirements, ISO 9001:2008.

4. Is the FSSC 22000-Q audit always a full audit?

Yes the FSSC 22000-Q audit is always a full audit. All the FSSC 22000 and ISO 9001 requirements have to be audited and reported on.

5. What are the normative requirements?

The requirements for the development, implementation and maintenance of the quality management system are laid down in the standard ISO 9001:2008 "Quality management systems - Requirements". All ISO 9001 clauses will be assessed in an FSSC 22000-Q audit.

6. What is ISO 9001:2008?

The ISO 9001 standard is a quality management system, undertaken by companies to illustrate their capacity to correctly adopt and manage a quality system. The ISO 9001 standard is based on a number of quality management principles including a strong customer focus, the motivation and implication of top management, the process approach and continuous improvement. Using ISO 9001 helps a company ensure that customers get consistent, good quality products and services, which in turn provides many business benefits. ISO 9001 includes similar requirements to ISO 22000, but it is not focused on food safety.

7. How will the revision of ISO 9001:2008 to ISO 9001:2015 affect FSSC 22000-Q?

FSSC-Q is currently linked to ISO 9001:2008. The effects of the revision of the standard to ISO 9001:2015 will be reviewed by FSSC 22000 and FSSC 22000-Q will be updated to incorporate ISO 9001:2015 once a decision to do so has been made by the Board of Stakeholders. The main revisions in 9001:2015 are:

- The High Level Structure (HLS). All the new ISO standards will comply with the HLS which is the new standard layout used by ISO.
- Introduction of risk management (Section 6.1) and focus on product integrity. This further aligns ISO 9001 with FSSC 22000 and facilitates the combination (integration) of the two standards in FSSC 22000-Q.

8. What is the required audit duration for FSSC 22000-Q?

In addition to the FSSC 22000 audit duration requirements shown in FSSC Scheme document Part II, Appendix II A1, section 5 and IAF MD 5:2013 (ISO 9001), the audit duration for the integrated FSSC 22000 and ISO 9001 audit shall be based on IAF mandatory document 11 (IAF MD 11), section 2.1.5.1. (insert link)

9. What are the requirements for auditor qualification?

The FSSC 22000-Q audit is a fully integrated audit. All the audit team members have to be qualified for FSSC 22000 and ISO 9001 i.e. fully qualified to conduct the integrated audit. In addition to the auditor qualification requirements shown in FSSC Scheme Document Part II, Appendix II A1, the auditor has also to be qualified for ISO 9001.

10. Is there an audit report template available?

In addition to the audit report requirements shown in FSSC Scheme Document Part II, Appendix A1, the audit report for the combined ISO 22000:2005 and ISO 9001:2008 audit shall cover all elements as indicated in Appendix 1 and 2 in order to confirm that all requirements are assessed and reported. A template for the integrated audit report is included in the FSSC 22000-Q scheme document.

11. What are the requirements for a CB to become licensed?

FSSC 22000-Q, section 3.1 requires that the CB shall have a valid ISO 9001 accreditation. CBs shall apply for a license with FSSC 22000 for the FSSC Q-Module. The existing license has to be extended for FSSC 22000-Q.

12. How is FSSC 22000-Q managed by FSSC 22000?

- The FSSC 22000 Integrity program will provide oversight of both FSSC 22000 and ISO 9001 to give confidence in the CB assessment & integration of the 2 management systems
- The integrated management system of FSSC 22000 with ISO 9001 is in line with ISO's current revision on management systems
- Only licensed CBs by FSSC 22000 can certify FSSC 22000-Q.

13. Will FSSC 22000-Q be benchmarked by the Global Food Safety Initiative (GFSI)?

Food quality certification falls outside of the GFSI benchmarking process and recognition. Nonetheless, FSSC 22000 will apply all its existing and future GFSI and ISO based requirements to the certification process for good governance and integrity ensuring security and confidence in the FSSC 22000-Q module. This means, as a start, that CBs, offering the FSSC quality module, must be approved by FSSC, accredited for ISO 9001 and auditors must meet all relevant competence requirements.
