

# **Food Safety System Certification 22000 Introduction Workshop FSSC Platform**

Jules Rojer – Technical Advisor

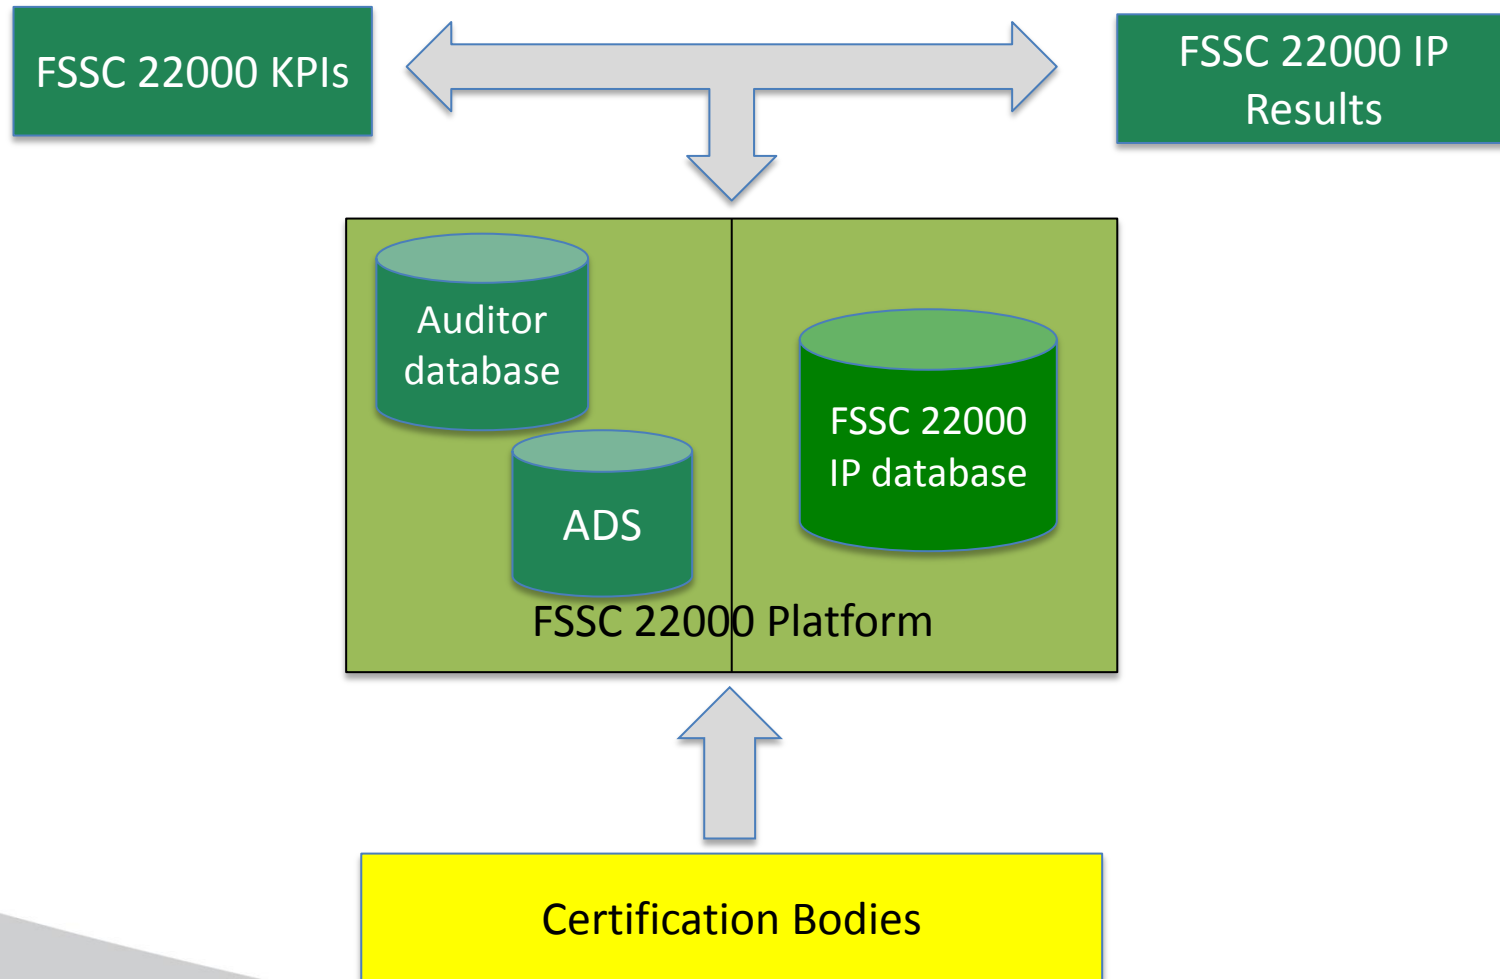

# Program

- 13.30 – 14.45 Workshop session
- 14.45 – 15.15 Refreshment break
- 15.15 – 16.30 Workshop session
- 16.30 – 16.40 Wrap-up and closing

# Today's topics

- FSSC 22000 Platform overview
- FSSC 22000 Integrity Program (IP)
- FSSC Platform development 2016/2017
- ViaSyst workshop

# FSSC 22000 Platform Overview

# FSSC Platform Overview

IT Database named ViaSyst (since 2012)

- FSSC Platform
- Data entry by the CB
- Certificates
- FSSC 22000 certificates shown on website

# FSSC Platform Overview – Auditor database

## FSSC 22000 auditor database (since 2014)

- Data entry by the CB
- Register of qualified FSSC 22000 auditors
- GFSI requirement

# FSSC Platform Overview – ADS

## Audit data summary (since 2015)

- FSSC 22000 database
- Data entry by the CB
- Summary of FSSC 22000 audit reports

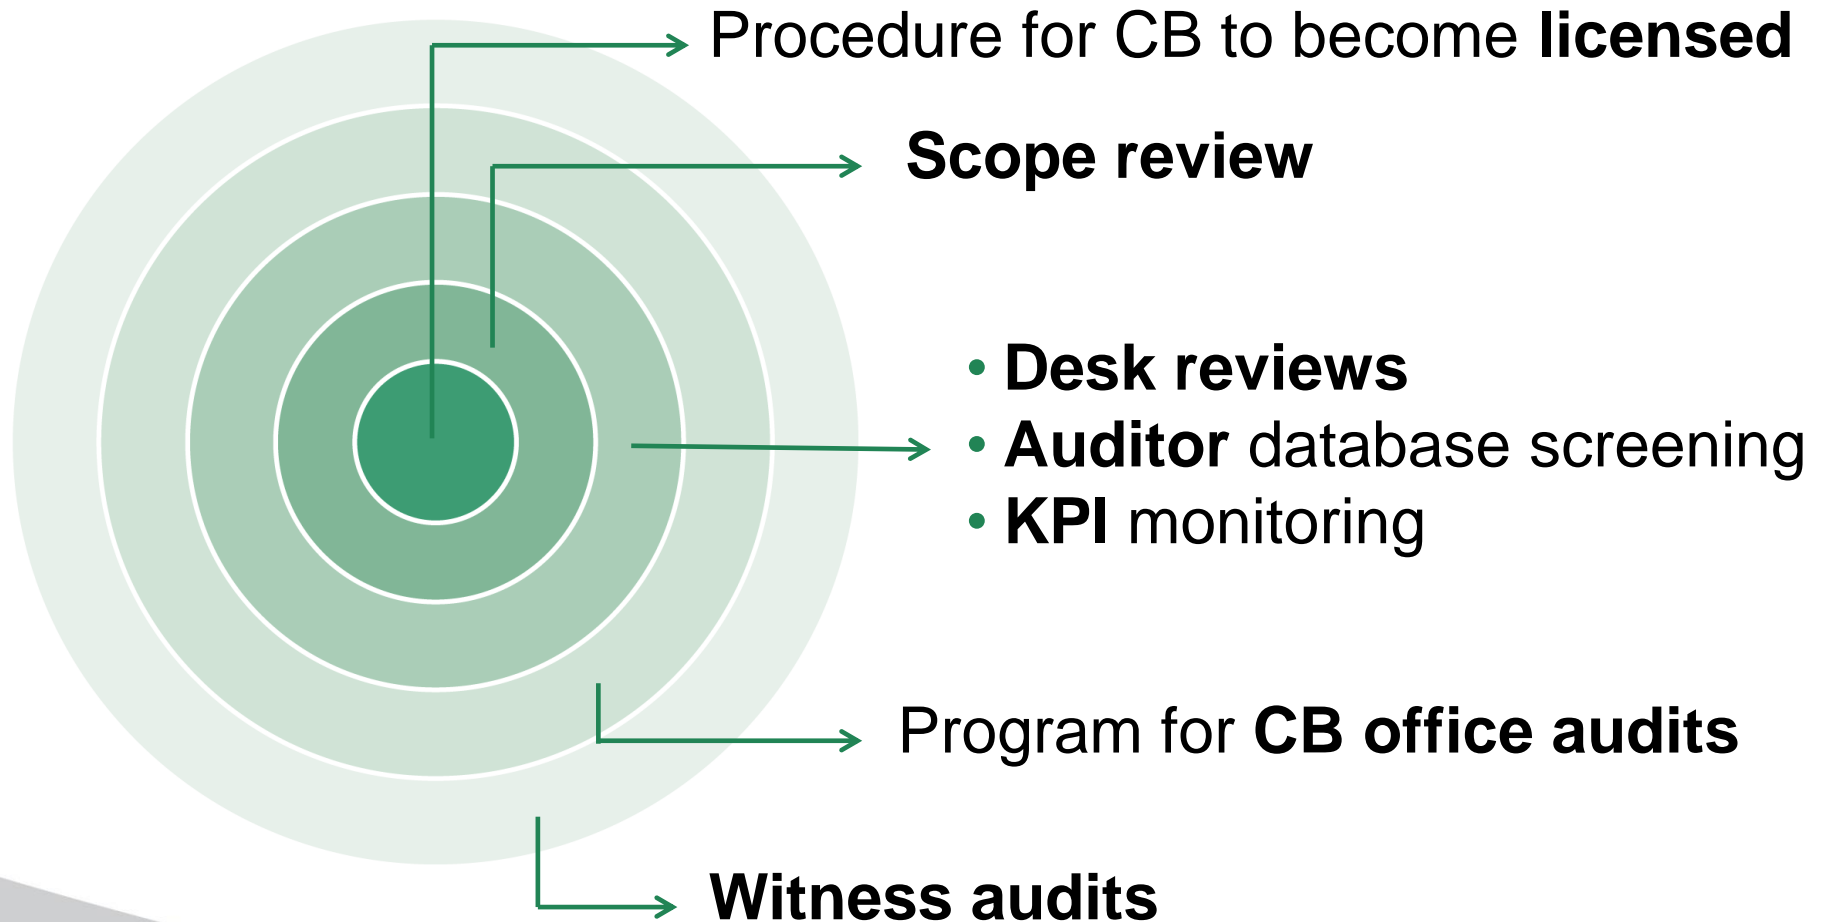

# FSSC Platform Overview – IP NC Manager

IP nonconformity manager (since 2015)

- FSSC Platform
- Upload documents by the CB
- Desk reviews are completely managed through the FSSC 22000 nonconformity manager

# Integrity Program

# Summary

The FSSC Platform is used for:

- Communication with CBs
- Management of IP desk reviews
- Publishing the results of CB KPIs
- Publishing certification status on FSSC 22000 website

# FSSC Platform Development 2016/2017

## Priorities

- Decision to focus on training of users
- Modernization of public list on the website
- Introduction of the mandatory audit report
- Improvement of the FSSC Platform

# Priority 1 – Training Strategy

Training for all users of the FSSC Platform:

- Dedicated training program
- Platform key-users
- Instruction movies available as help function
- Dedicated technical webinars

## Priority 2 – A key-user for every CB

### Role of the key-user:

- Manage the access rights for other CB users
- Train & assist all other CB users to enter audit data
- Filter any user demand and solicit ViaSyst Helpline
- Responsible for all communication with ViaSyst
- Attend mandatory annual update training

## Priority 3 – Mandatory audit report

The report consists of three modules:

- General information on certified organization
- Summary per V4 section
- Checklists

The introduction will be accompanied by a dedicated training program for all CBs

## Priority 4 – FSSC 22000 version 4

There will be some new features introduced:

- Only reports of active auditor can be uploaded
- New certificate created after re-certification audit
- Pop-ups to prevent incorrect data entry
- Validation procedure simplified

# Auditor exam

- Auditor competence = knowledge + skills
- Requirements developed by GFSI ACSC Working Group for knowledge testing
- Offered by Greenfence to FSSC
- A separate platform where the auditor can do the basic exam for all GFSI schemes
- Database of all GFSI auditors
- Auditor mutual recognition between SOs

# Conclusion

The Platform will focus on:

- Communication with the CBs
- Manage the IP desk reviews
- Introduction of the mandatory audit report
- Adaptation to FSSC 22000 version 4
